If your child loves LEGOS® and is looking for a new challenge this summer, then we have a camp for you. Children will have fun programming a LEGO® Mindstorms® Robot. Working individually, your child will have a hands-on, team-centered, and project-based experience learning basic engineering concepts. Topics of mechanical design, gear ratios, and programming will be explored using the LEGO® Mindstorms Robotics system. This is an excellent opportunity for children to get hands-on experience while having a whole lot of fun. Participants will not take the computer or LEGO® Robot home. Students bring a sack lunch. Water will be provided.

Age: Incoming 5th to 7th grade
